

## Administrator Workbench: Global and Virtue Setting

#### Admin Workbench: Global Settings

1. "Settings" will be highlighted in the main navigation to indicate the current location in the web app.
2. Breadcrumbs will provide the current location of where the user is in the web app.
3. Navigating to "Settings" using the workbench menu, the default view will be the Global Settings page.
- 4a. The global settings page will display 4 to 5 categories of settings. The first category will always be the first view.
- 4b. Each category will display the associated content to the right of the category tabs.
5. Virtue Settings will be available when creating or editing a virtue. Virtue Settings will have 4 categories organized in tabs: General, Network, Resources, and Sensors.
6. The virtue settings panel will be resizeable.
7. Inter-Virtue Access will list all virtues that have been created.
8. The Network tab allows the user to set network parameters for the virtue.
9. The Resources tab allows the user to either use the global settings for the virtue or customize it.
10. The Sensors tab allows the user to either use the global settings for the virtue or customize it.
