Administrator Desktop

Administrator Savior Desktop

1. When the desktop is launched, the only thing showing will be the Control Panel with a button to launch the Savior Workbench
2. When the Savior Workbench button is clicked, it will launch the Workbench Web App
3. The Workbench menu bar will provide a way to navigate to the different sections of the web app.
4. The current location of the web app will be indicated by the highlighted corresponding navigation item and the breadcrumbs.
5. By default, the workbench will open up to the Savior Home page (Dashboard)
