The screenshot shows the Savior Workbench interface. The top navigation bar includes icons for Home, Virtues, Users, and Configuration, with Configuration being the active tab. Below the navigation is a breadcrumb trail: Home > Configuration. The main title is "Global Settings". On the left, a sidebar lists Active Directories, Application VMs, and Resources, with Resources selected. A central modal window titled "Add New Resource" is open, prompting for a File Share resource type (set to NFS), file share name, server address, and folder path (with a "Browse" button). It also includes share permissions (Read, Write) and an option to use Active Directories credentials. At the bottom of the modal are "Add" and "Cancel" buttons. In the background, there's a table with columns for printer names (Xerox Phaser 6510, Falls Church, VA), location (Offline), and a status column with checkboxes. A large "Save" button is located at the bottom right of the main content area.
